Answers

Step 4: The house of Jules Verne

Big sphere:
5m diameter = 2,5m radius.
The area is about 78,5m². Volume is about 65,4m^3.

Small sphere:
3,5m diameter = 1,75m radius.
The area is about 38,5m². Volume is about 22,4m^3.

Step 1: A stroll in the parks

Electric boat: 20-minute ride.
Jon boat: 1h and 48 minutes.
Group boat: 1h and 30 minutes.
30 minute and 1h of free time: electric boat. 2h: jon boat.

Step 5: The Jules Verne circus

The average price paid by a visitor is 17,9€
The Q1 price paid by a visitor is 10€.
The median and Q3 are 25€.

Step 2: The cathedral

Width of the model nave: 6,4cm²
The actual nave is 145m long, 32m wide and 43m high, for a
volume of 200 000m^3.

Step 6: The Picardy museum

There are 9 windows, which means 511 are waving at you in total.
Check out Sissa's wheat and chessboard problem for more information!

Step 3: Rue des trois cailloux

The lines cross on (7,5 ; 5,2), which is where the mansion used
to be.
